

Issuing White Label Prepaid Cards for Your Business

About WDN

WDN is a Fintech company located in S KOREA. We issue business prepaid cards and provide necessary software to individuals and companies. The prepaid card market is growing rapidly, but it is a market that requires careful attention. The success of your business depends on which company you choose. WDN issues prepaid cards for legitimate businesses and offers white labels and card designs depending on your needs. We are an official partner of Mastercard Issuer.

WDN is headquartered in S Korea and was launched in 2024 with the goal of providing a reliable and easy-to-manage card program.

What is the Business **Prepaid** Card

A business prepaid card is a card program aimed at corporations to pay salaries or commissions to customers or employees.

NO! Bank Account

Regardless of your credit rating, you can immediately use financial transactions without a complicated account setup at the bank.

Anytime, Anywhere

It can be used anywhere in the world without restrictions, including merchants, restaurants, and online shopping that accept Master Card.

Reloadable Card

You can use your card by charging cash or crypto through an easy virtual account.

Realtime Transaction

You can receive transaction details in real-time, strengthening card security and enabling planned spending.

Market Analysis

The prepaid card market is growing rapidly.

According to Yahoo Finance, the prepaid card market is expected to exceed \$6.8 trillion by 2030. As of 2017, the amount of prepaid cards used in European countries alone exceeds \$700 billion and is increasing by \$50 billion every year. Currently, many European countries use prepaid cards. However, the market is gradually expanding to the United States, South America, and Asia.

The Current Problems

Be careful when choosing a card issuer.

When choosing a prepaid card program, the most important thing is which company you use. Prepaid cards may take more than three months to be issued, and in some cases, the issued card may become unusable. For example, if you use a European prepaid card that is not approved in Korea, Korean banks will block ATM payments, even if not immediately, and eventually the program itself will not be usable in Korea.
